## PROJECTS

---

**Expense Tracker Web App** — [GitHub Repository](#)  
Full-stack application for managing personal expenses. Features include CRUD operations, file uploads, AI-powered categorization, and user notifications. Built using Node.js, Express, SQL, and HTML/CSS.

**LEARNHUB** — [GitHub Repository](#)  
Developed LearnHub, an online learning platform enabling flexible, self-paced, and device-friendly education with course management, forums, and certification features. Built to support students, educators, and administrators through interactive and accessible digital learning tools.

**Academic Resources Portal (Andhra Pradesh)** — [GitHub Repository](#)  
Developed an interactive web platform displaying academic resources across fields like medicine, technology, and arts with future plans for AI-based content verification and data visualizations.
